

I have a long commute every day, when I am able to keep a FM or AM frequency longer than 20 minutes, I want to hear weather/news/traffic reports - not ridiculous babble by 3 to 4 radio stations with the same blase' format. Satellite radio is worth my fee as I am isolated in the midwest. The fact I have to write this letter tells me how far our government processes have eroded. It's time for the NAB to get involved with their broadcasters and develop marketing strategy, not abuse the purpose of the FCC; it's a free market. Please, oppose HR4026!
